

Bio:

After earning his Bachelor's degree in Criminal Justice and Psychology at the University of Maryland, Morgan began his career in the legal field, where he worked as a Litigation Paralegal for several years. He brought this set of skills to a progression of roles at the Institute of Hazardous Materials Management, ultimately serving as the Institute's Acting Executive Director. He left the Institute to pursue his Master's Degree in International Economics and International Relations at the Johns Hopkins School of Advanced International Studies, during which he served in internships at the U.S. Department of State and the U.S. Department of Agriculture. Now a Fellow at Pacific Northwest National Laboratory, Morgan focuses on nonproliferation policy at the U.S. Department of Energy's National Nuclear Security Administration in Washington, DC.

Why I am running and why you should vote for me:

As we continue to live in a time of great uncertainty that will no doubt challenge the Institute's leadership with difficult choices, this is a critical juncture for IHMM to re-dedicate itself to serving, empowering, and advocating for you, the certificant, the core of all IHMM stands for. Having dedicated five years of my professional life to supporting, administering, and growing the Institute's critical programs and serving its certificants, I care deeply about IHMM's future. No other candidate brings the wealth of detailed and specific operational experience I have across the Institute's programs. This insight would be uniquely valuable to the Board, and my experience in budget management and planning, institutional learning, and policy would also prove to be great assets to the Board. I sincerely hope you will do me the honor of electing me to serve this incredible and worthy mission.
