

Contents

Preface

Contributors

Section 1 Hazards of Materials

1. Chemical Basics
2. Hazardous Properties of Materials
3. Biological Hazards
4. Chemical Analysis

Section 2 Impacts of Hazardous Materials

5. Fate and Transport of Materials in the Environment
6. Ecosystem Impacts of Hazardous Materials
7. Assessing Site Risk

Section 3 Management Fundamentals

8. Overview of Legal Liabilities
9. Regulatory Basics
10. Economic Aspects of Hazardous Materials Management

Section 4 Hazardous Materials On-Site

11. Transportation of Dangerous Goods and Hazardous Materials
12. Distributing and Storing Hazardous Materials
13. Controlling Workplace Chemical Exposures
14. Manufacturing Chemical Substances
15. Manufacturing with Hazardous Materials
16. Pollution Prevention

Section 5 Hazardous Materials Disposal and Releases

17. Managing Water Discharges
18. Managing Air Emissions
19. Managing Solid and Hazardous Wastes for Generators

Section 6 Hazardous Materials Incidents

20. Preparing for and Responding to Incidents
21. Incident Reporting

Section 7 Remediation of Contaminated Sites

22. Environmental Site Assessment
23. Corrective Action Procedures
24. Remediation Technologies

Section 8 Substances with Special Standards

25. Asbestos
26. Lead
27. Polychlorinated Biphenyls
28. Stratospheric Ozone-Depleting Substances
29. Radioactive Materials
30. Pesticides
31. Infectious Substances and Etiologic Agents

Section 9 Managing the Whole System

32. Environmental Management Systems
33. Assessing Hazardous Materials Management Performance
34. Program and Project Planning for Hazardous Materials Management

Answers to Practice Problems
