

Stephen M Bennett Bio

I have been a safety professional for over 40 years and have a passion to continue the growth and development of our profession. I served on the ASSE Foundation (ASSEF) (currently the ASSP Foundation) for eight years and was president for one term. I have service on NFPA 70E committees and various human services; therefore, I have a foundation in how to work within a board and team setting. I have been in leadership roles in all prior employment. I have set strategy, goals and direction or been part of the leadership team which has implemented these initiatives. I have a passion to grow and develop our profession. I would look forward to serving in any fashion which is best for the board to meet this need. I believe my experience would allow me to perform a wide variety of functions within the HMS. My background at the ASSEF should fit with the mission and direction of the HMS. I hope to be able to continue the current processes of strengthening the organization - allowing us to better serve current membership and be a professional advantage for new members. The exact nature of my involvement would be based upon the established strategy/strategies for the near term. I am confident my experience will allow me to assist in many different ways. My goal would be to ensure the HMS is seen as a benefit to all IHMM members and applicants.
